

MRS. OSWALD

Mrs. Oswald and her students are learning about the **Marie Curie**, a Nobel Prize winner in chemistry who developed her own path even in a difficult environment. We will learn how her dedication to research led to her discovery of radium, which paved the way for the invention of x-ray machines.

We will view a kid friendly video and discuss “Marie Curie Facts for Kids” and “Famous Inspirational Quotes of Marie Curie”. The students will pick a quote and write a few sentences about how it relates to their experiences in learning math and science.
