

Math at Home Week 13

Dear Parents,

Below are some optional, fun, Math related activities for you to do at home with your children. These activities allow Math to be combined with play and let your kids have fun while learning! I've also included some websites that make math part of your child's everyday life!

Sincerely,

Angelina Rodriguez

<p>Beach Ball Facts: This game can be played with as little as one player to a whole large group of players. Before playing, write math facts on the spaces of a beach ball. Choose facts based on your child's grade level. To play alone, the player simply tosses the ball up in the air, catches it, and answers the question closest to him/her on the beach ball. If playing with other children, the ball is tossed back and forth and each player answers the question closest to him when he catches the ball.</p>	 A colorful beach ball with segments in pink, yellow, and light blue. Handwritten math problems are visible on the segments, including $5+5=$, $7+3=$, and $3+3=$.
<p>Invisible Man: Draw a man (stick figure with a hat, cane, or whatever you want to add) in the sand, dirt, etc. Ask your child a math question- if they get it right they can erase 1 body part (an arm, a leg, etc.). The goal is to make the man invisible.</p>	 A simple black stick figure drawing of a man with a round head, a smiling face, two arms raised, and two legs.
