TASK #1

Choose any two items from the menu. Write the names of the items, the cost of each and then find the total cost of ordering both.

TASK #2

Choose any three items from the menu. Write the names of the items, the cost of each and then find the total cost of ordering all three.

TASK #3

Choose any four items from the menu. Write the names of the items, the cost of each and then find the total cost of ordering all four.

TASK #4

Find the total cost of the two fruits available on The Grill's menu. Write the names of the items and how much it would cost to buy both.

TASK #5

Choose three drinks from the menu. Write the names of your choices and how much it would cost to order all three?

TASK #6

Choose any two desserts from the menu. Write the names of the desserts and how much it will cost to order both.

TASK #7

Find the total cost of ordering all four of the side dishes from the menu.

TASK #8

Choose two items to create a yummy breakfast. What is the cost of the breakfast you chose?

TASK #9

Choose a meal, a side dish and a drink from the menu. Write down the names of the items you ordered and how much they will cost.

TASK #10

Choose a meal, a side dish, a drink and a dessert from the menu. Write down the names of the items you would like and the total for your order.

TASK #11

Choose at least six items from the menu to create a meal for two from The Grill. Write down both meals and how much the total bill will be for all the food.

TASK #12

Choose any combination of six desserts from the menu. Write down the names of your choices and how much it would cost you to purchase all six items.
