NJ Student Learning Assessment for Science

The NJSLA-S measures student proficiency with the NJ Student Learning Standards for Science and is administered to students in grades 5, 8 and 11.

- Examines students' performance of scientific and engineering practices in the context of cross-cutting concepts and disciplinary core ideas
- Three dimensional nature of the standards requires complex performance assessment tasks.
- Spring 2019 was a baseline test. Results are due to be reported to schools.
