

Dear Parents,

Below are some optional, fun, Math related activities for you to do at home with your children. These activities allow Math to be combined with play and let your kids have fun while learning! I've also included some websites that make math part of your child's everyday life!

Sincerely,

Angelina Rodriguez

<p>Number lines are wonderful for all sorts of math games and activities. Make one big enough for kids to stand and jump around on using sidewalk chalk (or painter's tape indoors). You'll use it over and over again.</p>	
<p>So simple and so fun! Give students a sheet with shapes to find as you walk around the house or backyard. Each time they find the shape, have them trace it on their worksheet and then make a mark to keep track of how many times they've seen it.</p>
