

Dear Parents,

Below are some optional, fun, Math related activities for you to do at home with your children. These activities allow Math to be combined with play and let your kids have fun while learning! I've also included some websites that make math part of your child's everyday life!

Sincerely,

Angelina Rodriguez

<p>Draw a giant clock face with sidewalk chalk. Choose two people to be the hour and minute hands, then call out a time and send them out to become the clock. Add more complicated elements by having them add to or subtract from the initial time too. ("Now it's 23 minutes later!")</p>	
<p>Math games using recycled materials are economical and good for the environment. Set up empty plastic bottles labeled one through 10 (or your choice of numbers), then roll the ball to see how many you can knock down. Add up or multiply the numbers of the knocked-over bottles to get your score.</p>
