

Math at Home Week 7

Dear Parents,

Below are some optional, fun, Math related activities for you to do at home with your children. These activities allow Math to be combined with play and let your kids have fun while learning! I've also included some websites that make math part of your child's everyday life!

Sincerely,

Angelina Rodriguez

<p>Lay out a grid like the one shown that has the answers to a set of math flashcards or problems you're currently working with. (This teacher used masking tape; you could also do sidewalk chalk) You can have children do it independently or have two players face off, one on each side of the board. Show the flashcard, and kids race to be the first to jump to the correct square with both feet inside the lines. For directions to the game visit: https://www.teachingandtapas.com/2013/12/awesome-free-game-for-mastering-ma.html</p>	
<p>Create a map of your house, backyard, or other area using graph paper (or even better – have kids help you do it). Then choose plot points for them to visit to find notes or small prizes. They'll feel like real treasure hunters!</p>
