

Math at Home Week 8

Dear Parents,

Below are some optional, fun, Math related activities for you to do at home with your children. These activities allow Math to be combined with play and let your kids have fun while learning! I've also included some websites that make math part of your child's everyday life!

Sincerely,

Angelina Rodriguez

Kids who love dance will get into this one. Make a number mat for each student like the ones shown. Shout/Show an equation with an answer between 10 and 99 on the screen. Kids figure out the answer and jump to put their left foot on the correct tens place, right foot on the ones. They'll be dancing and spinning as they learn!

You're going to need to be willing to get a little wet for this one, but kids simply adore math games (or any games!) with water balloons. Fill and label balloons numbered 1 through 20 (or whatever numbers you're working on). Draw the numbers in a big circle on the sidewalk. Then have a student choose a balloon, find the matching number, and head off to make a splash!
