

Math at Home Week 10

Dear Parents,

Below are some optional, fun, Math related activities for you to do at home with your children. These activities allow Math to be combined with play and let your kids have fun while learning! I've also included some websites that make math part of your child's everyday life!

Sincerely,

Angelina Rodriguez

<p>Get practice with low number counting and addition using action dice. Write activities like jump, clap, or stomp on a small wooden block (or write actions on paper and pick out of a hat), then roll it along with a pair of dice. Kids add up them up (you could do this with subtraction too) and complete the activity the number of times shown.</p>	 A photograph showing a green die, a white die, and a small wooden block with handwritten instructions: "Jump" with an upward arrow, "Spin" with a circular arrow, and "Clap" with a hand icon. The watermark "BuggyandBuddy.com" is visible in the top left corner.
<p>Use items around your house to make your own putt putt course. This can be a simple game where kids simply shoot for the highest (or lowest) number. But you can also drive up the complexity by putting equations on the cups that kids have to solve first to determine which is the best cup to aim for.</p>	 A photograph of a putt putt course setup. It includes a pink clipboard with a yellow frame and a white marker, a purple pencil, a green ball, and three red and yellow cups labeled 1, 2, and 3. The clipboard has a pink sheet of paper with the names "MIALE" and "SADIE" and the numbers 1, 2, and 3 written on it.
