

Math at Home Week 11

Dear Parents,

Below are some optional, fun, Math related activities for you to do at home with your children. These activities allow Math to be combined with play and let your kids have fun while learning! I've also included some websites that make math part of your child's everyday life!

Sincerely,

Angelina Rodriguez

<p>Give new life to your Twister mat by adding numbers! For more advanced players, instead of saying "Right hand 5," try saying "Right hand 14 – 9" to make them think.</p>	 <p>A child in a blue shirt is playing Twister on a white mat with large colored circles (red, blue, yellow, green) and numbers. The child is in a crouching position, balancing on one hand and one foot. A watermark "MathGeekMama.com" is visible in the bottom right corner of the image.</p>
<p>Use sticky darts and draw two dartboards side by side. You can label the rings with any numbers you like. Kids throw the darts and then add, subtract, multiply, or divide the numbers – your choice!</p>	 <p>Two hand-drawn dartboards are shown on a whiteboard. The left dartboard has concentric circles labeled 10, 20, 30, 40, 50, and 60. The right dartboard has concentric circles labeled 10, 20, 30, 40, 50, 60, 70, 80, and 90. A green sticky dart is stuck in the center of the left board, and a blue sticky dart is stuck in the center of the right board. A watermark "www.illustrativemathematics.org" is visible in the bottom right corner of the image.</p>
